

ARE YOUR STUDENTS WORTH A PENNY PER DAY?

Education is changing - but millions of students still lack access to digital learning. Limited connectivity, insufficient resources, and infrastructure gaps prevent schools from providing engaging, personalized education.

What if you could give every student access to cutting-edge AI-powered learning for less than a penny per day per student?

The **C3 Micro-Cloud** makes this possible. It delivers digital content, applications, and fully offline AI tools, overcoming connectivity and infrastructure challenges — enabling a **SAFE AI** (**S**-ecure, **A**-ppropriate, **F**-unctionally Specific, and **E**-conomically Feasible) in any educational environment. Students can access your local **C3 Micro-Cloud** for all of this using their existing PC, Chromebook, tablet - even a mobile phone!

It's time to harness artificial intelligence to open opportunities for every learner—equipping them to thrive, anywhere, anytime.

THE SAFE AI APPROACH

An AI-enabled digital learning environment where sensitive information (PII, confidential HR and administrative information, custom curriculum, etc.) is protected from getting 'out', and unsafe data (malware, ransomware, incorrect or illicit information, etc.) is kept from getting 'in'.

The data and knowledge used by language models must have guardrails to ensure content is appropriate in both understanding level and cultural context. Prohibited information should be excluded, and prompts should guide users according to their level, persona, and tasks.

AI must be focused on specific tasks, users, and outcomes to be effective. Defining clear personas—student, teacher, or administrator—ensures that prompts and outputs are appropriate and aligned with each user's goals.

Designed for global deployment, this solution aims to cost less than \$0.01 per student per day. Its low-cost, scalable design makes advanced AI-powered learning accessible to every classroom, regardless of location or available resources.

FOR ONLY A PENNY PER DAY PER STUDENT, THE C3 MICRO-CLOUD IMPROVES EDUCATION FOR:

Students

- Access global resources (videos, quizzes, podcasts, AI tools).
- Use any device, even with limited/no internet.
- Get real-time feedback to track progress.
- Learn in an engaging, interactive environment.
- Boost motivation and future preparedness.

Teachers

- Equip teachers with tools for flexible, quality education.
- Utilize AI-powered tools for lesson planning.
- Track student progress in real time.
- Adapt instruction to meet individual needs.
- Access diverse curricula and learning materials.
- Gain insights to help students succeed faster.

Administrators

- Distribute approved content from one central location.
- Push updates when internet is available.
- Enhance browsing speed through caching (HTTP/HTTPS).
- Prioritize content based on user profiles.
- Ensure safe browsing in line with school policies.

WHAT DOES IT COST TO GIVE YOUR STUDENTS A 21ST-CENTURY EDUCATION?

Investing in your students' future can be simple and affordable. **With the C3 Micro-Cloud, schools can provide 21st-century learning tools for just a penny per day per student**!**

Today's learners need access to modern technology and digital resources to thrive in a global economy. By providing them with the right tools, you're not only preparing them for tomorrow's challenges but also giving them the confidence to succeed today.

Take the next step toward transforming your classrooms. Together, we can make a lasting impact on your students' education and their future!

For just a penny per day per student**, you can open doors to a technology-driven future!
